

Dear Residents and Families,

Our top priority is to ensure the health and safety of all our residents and team members, and we remain committed to following all national, state, and local guidelines. We will continue retesting residents if they show any COVID-related symptoms; screening all team members prior to the start of their shift (if a team member shows any COVID-19 related symptoms, they are sent home to self-quarantine); enforcing proper physical distancing; performing curbside cleaning of all packages/furniture to be brought into the building; and implementing ongoing, enhanced cleaning throughout the community.

You may have seen our “Shining the Light on COVID” post this week on our Thrive Facebook pages. If you haven’t, we highly recommend it. Our President, Les Strech, spent time visiting our COVID-positive communities to listen and share stories from the perspective of our residents, families, and team members. We strongly believe that these videos are powerful and impactful – showing what is really happening inside a COVID-positive community. We are proud to shine a light on COVID. Help us to spread that light by sharing with your friends and family -- visit www.SHININGTHELIGHTONCOVID.com.

Our weekly family video series from Thrive President Les Strech continues this week. Please visit: ThriveSL.com/YOURCOMMUNITYNAMEHERE/Family for the latest edition.

Finally, we can’t let this week pass without recognizing that Father’s Day is quickly approaching. We know this holiday, too, will look different than in previous years, but nonetheless, we want to celebrate the men in our lives. Our dads are typically the first man many of us love. He is the one who pushed us to reach new heights, and the one who helped us up when we fell. We are looking forward to honoring all of the dads in the community! We are also encouraging families to be sure to schedule your Clear Connection and virtual visits for Father’s Day.

Stay safe. Stay strong. And know we are here for you!

Be well,
Tammy L. Marshall
